LIST 2.b.1

SECTION 2.b MASTER ROOMS LIST

INSTRUCTIONS: Below is a master list to be used for reference in assigning room names to the school model(s). All room names are listed in a pull-down menu on the LRFP Project Website. In order to shorten the length of the lists, the rooms are classified into "space type categories" and "disciplines" as listed below. Two or more variations can be created for a single room name by describing different characteristics (room size, support spaces, fit-out) for that space.

In addition to serving as a reference for completing the model "rooms" data collection forms, the master rooms list can also be used to select all rooms that should be included in a particular model and/or to confirm that all desired rooms have been documented and entered into the website. It also shows the rooms that are included in the Facilities Efficiency Standards (F.E.S) for a given student population and and their status as capacity generating spaces.

This master rooms list should be used when developing space programs for the school models, using the downloadable excel spreadsheets provided on the LRFP project website.

If a desired room name does not appear on the list, submit an RFI on the LRFP Project Website.

F.E.S. STATUS

(✓)= Included; not capacity-generating

(✓c)= Included; capacity-generating

CATEGORY	DISCIPLINE	ROOM NAME	E.S.	M.S.	H.S.
